PROJECTS

AK Cooling System (ASP.NET, C# | SQL Server)

A CRM system managing customer & employee records. Features include customer registration, PMS/AMC service assignments, complaint handling, and service tracking with digital signatures.

Smart Photo Selection (Laravel, PHP | MySQL)

Developed a web-based image selection system for photographers, reducing dependency on physical storage devices and streamlining customer interactions.

Attendance Management System (Android Studio, PHP | MySQL)

Built a mobile app for faculty to manage student attendance with report generation features.

Rent Your Equipment (Flutter | Firebase)

A consumer-to-consumer rental platform allowing users to browse and rent equipment with detailed item listings and seamless transactions.
